25. Short Location or Area Description (list all affected areas or a reference point): 2 Miles East of Omo Ranch, 4 miles South of Grizzly Flat			26. UTM Coordinates: Zone: Easting: Northing:								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): https://ftp.wildfire.gov/public/incident_specific_data/calif_n/!CALFIRE/!2021_Incidents/CA-ENF-024030_Caldor/GIS/											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Active Long-range Spotting											

Incident Status Summary (ICS-209)

Incident: **CALDOR**

**Torching
Crowning**

Narrative:
The fire activity increased in the early portion of the day due to southwest winds surfacing once the inversion dissipated. The main fire spread to the northeast aided by the winds and spotting of up to 1/2 mile. Spot fires continued to be found across the entire incident, causing control issues in almost all branches. Fire weakened timber continues to release in all areas causing rollout, block travel and escape routes, and produce an abundant amount of ember cast. Ignitions were becoming established easily in the very dry receptive fuel bed. ERC levels are above the 90th percentile. 100hr fuels are below the 10th percentile, and 1000 hr fuels are below the 3rd percentile.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)
Light Logging Slash
Brush (2 feet)**

Narrative:
There is a heavy dead and down component with drought-stressed fuels. Live fuels are cured to levels normally seen in late September, and fuels are extremely receptive to spotting. Fuel moistures are historically low. Northern California remains under a Fuels and Fire Behavior Advisory. ERC's are above the 97th percentile. 100 hr and 1000hr fuels are below the 3rd percentile.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

Damage inspections are in progress with apx 15% of the fire perimeter being inspected to date. Inspections were hampered by an increase in fire activity in the area. Reconciliation with the county website will be ongoing.

One school, one church, a post office, and two fire stations (Grizzly Flats Forest Service and Pioneer F.D Station 35) were destroyed.

Substantial critical utility infrastructure damage and destruction has occurred in the Grizzly Flats area. Damage assessment is underway. PG&E currently has apx 3,000 customers without power.

Increased numbers of structures threatened came from the addition of Amador County data for the evacuation warning already in place.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	15,980	15	345
F. Multiple Residences	931	0	0

Incident Status Summary (ICS-209)

Incident: **CALDOR**

- **South of Highway 50 from Snows Road to Ice House Road.**
 - **Between Highway 50 and Slab Creek from Snows Road to Ice House Road.**
 - **South of Highway 50 from Ice House Road to Silver Fork Road. This includes the community of Kyburz.**
 - **North of Highway 50 from Ice House Road to Silver Fork Road to include Ice House Reservoir, Union Valley Reservoir, and Loon Lake.**
- EVACUATION WARNINGS:**
- **North of Slab Creek to Wentworth Springs Road between Sand Mountain and Loon Lake.**
 - **Mosquito Road from the bridge North to include the Community of Swansboro.**
 - **North of Highway 50 to Slab Creek between Smith Flat and Snows Road.**
 - **South of Highway 50 to Pleasant Valley between Smith Flat and Snows Road, and North of Pleasant Valley between Holm and Newtown.**
 - **South of Pleasant Valley between Bucks Bar Road and Newtown Road, East of Bucks Bar Road to Mt Aukum Road.**
 - **Southwest of Bucks Bar Road to Ladies Valley Road including the community of Outingdale, Ant Hill Road, Perry Creek Road and Sand Ridge between Ladies Valley Road and Bucks Bar Road.**
 - **East of Mt Aukum Road (E16) from Bucks Bar Road to Omo Ranch Road. North of Omo Ranch Road to the intersection of Omo Ranch Road and Fairplay Road.**
 - **South of Omo Ranch to the El Dorado County Line between Mt Aukum Road (E16) and Fairplay Road to include Coyoteville Road, Cedar Creek and all tributary roads.**
 - **North of Slab Creek to Wentworth Springs Road between Sand Mountain and Loon Lake.**
 - **Mosquito Road from the bridge North to include the Community of Swansboro.**
 - **North of Highway 50 to Slab Creek between Smith Flat and Snows Road.**
 - **Silver Fork Road in Kyburz east to Twin Bridges.**

Incident Status Summary (ICS-209)

Incident: **CALDOR**

- North and south in a line extending from Twin Bridges to the Placer County line and south to the Amador County line.

AMADOR COUNTY - EVACUATION WARNINGS

- Shenandoah Road at the Amador County line west through the River Pines community, continuing west on Shenandoah Road to Ostrom Road. South on Ostrom Road to Jibboom Street, West on Jibboom Street to Fiddletown Road. East on Fiddletown Road to Hale Road. South on Hale Road to Shake Ridge Road. East on Shake Ridge Road to Charleston Road. South on Charleston Road to the intersection of Charleston Road and Rams Horn Grade. Due east to Highway 88 at Tiger Creek Road. Tiger Creek Road east to Salt Springs Reservoir Road. East on Salt Springs Reservoir Road to the east end of the Salt Springs Reservoir. Due north from the east end of Salt Springs Reservoir to Highway 88.

- South of the El Dorado-Amador County line with a western border of Highway 88 due south to the east end of Salt Springs Reservoir. Southern border of the Calaveras County line. Eastern border of the Alpine County line.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

Observed: Smoke inversion conditions prevailed through 1200 then skies became sunny. High temperatures ranged from 71-81 degrees with relative humidity minimums of 30-35 percent common. Winds were light downslope under the inversion then when skies cleared. Upslope and up-canyon winds Of 5-9 mph with gusts to 15 mph developed and prevailed through the afternoon.

Forecast for tonight: Mostly clear with areas of smoke. Lows 50-60. Humidity recovery 50-55 percent. Winds becoming downslope (easterly) 2-6 mph.

Forecast for Sunday: Sunny with areas of smoke. Highs 71-81. Relative humidity minimums 25-32 percent. Winds downslope 2-6 mph through 0900 then becoming southwest 5-9 mph with gusts to 15 mph.

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours:	Fire spread will slowly after 21:00 due to the winds slowing across the fire area. Winds will become terrain driven after 21:00 and allow for downslope/down canyon breezes. Growth is expected in all areas, except the western portions of branch 1. Moderate humidity recovery will aid in slowing fire spread, but spot fires will become active throughout the shift.
24 hours:	Southwest winds will continue in the area with ridgeline winds slowing to 4-9mph. Fire growth will continue in all areas of the incident, with minimal growth at the southern portions of the heel. Major growth will continue on the on the north and northeastern flanks. Minimal inversion and smoke layer should clear before noon, with fire activity increasing quickly aided

Incident Status Summary (ICS-209)

Incident: **CALDOR**

	<p>by the up-canyon breezes. Smoldering spot fires will begin to become active once exposed to the wind and sunny conditions. Spotting will be over 1/2 a mile, with the Probability of Ignition above 87%. Group tree torching and small crown runs will be possible in areas where the fire is in alignment with the steep drainages. Understory burns will aid in the clean up of heavy dead and down fuels within the perimeter. Moderate humidity recovery will be expected overnight allowing for a decrease in fire activity.</p>
48 hours:	<p>Large fire growth will continue in the North and Northeastern areas but be moderated by the return of the diurnal wind patterns. The inversion will break up by 9am allowing for more heat and winds to reach the fires edge and interior drainages. This will funnel the winds through the canyons that are in alignment with the southerly flow. Ember cast and rollout will continue to be the main source of fire spread. New spot fires up to a 1/2 mile from the fires active edge will become active</p>
72 hours:	<p>Fire growth will continue in all areas, except the southern portion of the incident. The diurnal flow pattern will continue to push winds up the multiple drainages that are in alignment. Deep seated heat will be more pronounced in stump-holes and areas of heavy fuel accumulation. Fire weakened timber will continue to hamper mop-up and control efforts.</p>
<p>Anticipated after 72 hours: Same as above.</p>	

37. Strategic Objectives (define planned end-state for incident):

Management Objectives:

- **Provide for emergency personnel and public safety at all times.**
- **Ensure COVID-19 precautions and best practices are met at all times.**
- **Protect property, improvements and infrastructure.**
- **Ensure coordinated, timely and accurate release of public information.**
- **Foster and maintain relationships with all cooperators and stakeholders.**
- **Protect economic, natural, cultural and heritage resources.**
- **Maintain fiscal accountability and keep costs commensurate with values at risk.**

Control Objectives:

Keep the fire

- **North of HWY 88 and Shake Ridge Rd**
- **South of Wentworth Springs Rd**
- **East of E-16 and Fiddletown Rd**
- **West of HWY 89**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Communities at risk:

12 hours: **Significant threat and potential devastation (greater than 75 percent of community loss) to the communities of Sly Park, Sierra Springs, Sly Park Hills, Somerset, Pleasant Valley, Grizzly Flats,**

Incident Status Summary (ICS-209)

Incident: **CALDOR**

Leoni Meadows, Pollock Pines, Spring Valley, River Pines, Riverton, Randal Tract, Camino, Cedar Grove, Kyburz, White Hall, Strawberry, Fresh Pond, Leoni Meadows, Happy Valley, Somerset, Fair Play, and Omo Ranch.

Facilities:

- **The following schools are in close proximity to the fire and directly threatened: Indian Diggings Elementary School, Walt Tyler Elementary, Silver Fork Elementary, Sierra Ridge Middle, and Pinewood Elementary.**
- **The El Dorado County Office of Education has issued school closures for all sites in the Camino Union School District, Gold Oak Union School District, Indian Diggings School District, Pioneer Union School District, Pollock Pines Elementary School District, and Silver Fork School District**
- **The following repeaters, used by CAL FIRE and local government agencies, are all threatened: Alder Ridge Repeater, Leek Springs Repeater, Willow Repeater, Union Hill Repeater**
- **Public safety facilities threatened include Pioneer Fire Protection District Stations, Amador-El Dorado Unit Headquarters, and the Eldorado National Forest-Pacific Ranger Station.**

Powerlines and/or electrical distribution:

- **PG&E's Sierra Division has numerous assets and critical infrastructure. These include overhead distributions lines, overhead transmission lines, the El Dorado Power House hydro-facility and associated equipment. These assets provide power to thousands of customers in El Dorado and the surrounding counties. Additional PG&E assets include distribution substations, telecommunications towers, fiber optic resources. The approximate value of these assets at risk is \$11,300,000.**

Domestic Water Systems:

- **The Grizzly Flats CSD has been heavily impacted by the fire including water storage and distribution infrastructure. The district receives water from surface collection and diversions, both of which are impacted and could result in the loss of water supply to apx 1,200 customers.**
- **The El Dorado Irrigation District (130,000 population) relies on surface water collection in the area of the fire. They operate a 23-mile conveyance system of critical importance for the supply of 1/3 of the district's water supply for consumptive use and provides water to generate hydroelectric power. The water in the conveyance is from EID's four mountain reservoirs and is very valuable because of the critically dry hydrological conditions facing El Dorado County. The value to replace this asset is over \$68 million dollars but the time to replace damaged or burned flumes could take up to a year. EID also operates a Diversion Facility in Kyburz that diverts the water from the South Fork of the American River to the 23-mile. The importance of this is the same as the canal.**
- **SMUD operates 17 dams; 11 reservoirs; nine powerhouses (688 MW generation capacity) and other essential facilities critical in providing power to the Sacramento region. This includes a 69kv transmission line with wood poles, 28 miles of tunnels, penstocks, and canals. The Riverton maintenance Yard is critical to ensure all equipment is operational.**

Current (12hr) threats are continued below...

... Continued from 12-hrs section above:

24 hours:

Communication Grid:

Incident Status Summary (ICS-209)

Incident: **CALDOR**

- **Critical fiberoptic line from El Dorado County to Lake Tahoe along HWY 50. Necessary for 911 systems and numerous cell towers. The Big Hill communication site, a communication hub for SMUD, CHP, several cellular carriers, and others. This site also includes the ENF's Big Hill fire watch tower.**

Transportation:

- **HWY 50 is closed from Sly Park to Myers. HWY 50 is a major Trans-Sierra highway vital to commerce, tourism, and emergency evacuation. Additional road closures are in place around the fire area with traffic control points in place.**

Historical and Significant Cultural Resources:

- **Numerous cultural heritage sites of the Shingle Springs Band of Miwok Indians including burial and village sites lie within and around the fire area. Other significant archaeological resources, historic, and cultural sites are also threatened.**

Natural Resources:

- **Threatened and Endangered (TE) state and/or federally listed species threatened by the Caldor Incident include Foothill yellow-legged frog, California red-legged frog, Sierra Nevada yellow-legged frog, Great grey owl, Goshawk and Spotted Owl, Yosemite toad, and Sierra Nevada red fox.**

- **Under the current Southwest flow, smoke from the Caldor fire is impacting the Lake Tahoe Basin causing periods of Unhealthy to Very Unhealthy Air Quality Index (AQI) readings in locations within the Placer County Air Pollution Control District and the El Dorado Air Quality Management District in California. Additionally, select locations within the following counties in Nevada are being impacted with periods of Unhealthy to Hazardous AQI readings: Washoe, Carson City, and Douglas counties.**

Commercial Resources:

- **Private businesses, commercial timberlands (Sierra Pacific Industries), vineyards, and other agricultural lands are threatened and/or impacted.**

Economic Impact:

- **Tourism impact with camping, hiking, hunting, boating, fishing & horseback riding sites threatened. Potential loss of jobs to local businesses, vineyards, wineries, and tasting rooms. Cattle grazing lands are impacted.**

48 hours: **Same as 12-24 Hrs threats.**

72 hours: **72 hrs and beyond, there is a potential threat to the Lake Tahoe Basin. Loss of property, critical infrastructure, and resources is possible. Likely impact to tourism, commerce, and continuity of business.**

Anticipated after 72 hours: **Same as 72 hr threats.**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **20 - Hand Crew Strike teams (G)**
20 - Hand Crew any type

Incident Status Summary (ICS-209)

Incident: **CALDOR**

18 - Dozers any type
16 - Type 3 Engine Strike teams
10 - Type 5 Engine Strike teams
10 - Type 6 Engine Strike teams (F)
30 - Type 1 Engine Strike teams (A)
75 - Type 3, 4, 5, or 6 Engines (Any type)
10 - Water Tenders Any Type
10 - Masticators
4 - Skidgine
3 - Feller Bunchers

AIR OPS:

1 - HELCO
1 - HEBM
1 - UAS with PSD Aerial Ignition module

OVERHEAD:

1 - Federal FSC
3 - OSC
4 - OPBD
17 - DIVS
5 - TFLD
6 - FELB
12 - HEQB
4 - FALM

24 hours: **Same as above**

48 hours: **Same as above**

72 hours: **Same as above**

Long-term weather forecasts (7+ days) show prolonged high temps over 100 degrees. Critical resource needs will increase the ability to gain progress prior to more adverse weather.

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
1) critical resource needs identified above,
2) the Incident Action Plan and management objectives and targets,
3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Fire growth continued in all branches. Available resources have been committed to structure defense and fire-front following tactics where possible.

Critical resource needs are essential for the defense of structures and infrastructure. Additional resources are needed to implement planned strategies and tactics before the fire progresses into less advantageous terrain, resulting in a longer-term, more significant incident. Social, political, and economic concerns will increase as the fire progresses toward the Lake Tahoe Basin.

Type I crews are needed for 7 days to support critical firing operations. Type II crews are needed for 10 days to support holding operations.

Steep and rugged terrain, critically dry fuel conditions, and lack of adequate resources have presented control challenges, limiting the ability for direct attack. These factors, combined with the complexity of the incident, have created a critical concern for the ability to assure firefighters and public safety. Life

Incident Status Summary (ICS-209)

Incident: **CALDOR**

safety and structure defense remain the current incident priorities.															
41. Planned Actions for Next Operational Period: Provide for life safety of citizens and emergency responders. Implement structure and critical infrastructure defense. Construct control lines and take advantage of targets of opportunity as allowed by fire behavior and resource limitations. Improve and hold established control lines. Prepare for firing operations and implement burn plan. Identify contingency lines.															
The ability to engage in direct attack with hose lays and handline construction remains limited due to a lack of adequate resources.															
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):															
43. Anticipated Incident Containment or Completion Date: 08/31/2021															
44. Projected Significant Resource Demobilization Start Date:															
45. Estimated Incident Costs to Date: \$18,995,576.00															
46. Projected Final Incident Cost Estimate:															
47. Remarks (or continuation of any blocks above – list block number in notation): The Eldorado National is closed from August 17, 2021, through September 30, 2021. (Forest Order No. 03-21-14)															
A Fire Management Assistance Declaration was declared on August 17, 2021. Incident Period: August 14, 2021 and continuing. (FM-5413-CA)															
The Governor of California declared a State of Emergency for El Dorado County on August 17, 2021 due to the Caldor Fire.															
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
