12. Prepared By: Print Name: <b>Jordan Abeel, SITL-t</b> Date/Time Prepared: <b>09/01/2021 0600 PDT</b>		13. Approved By: Print Name: <b>Dusty Martin, DPIC</b> Signature: _____											
14. Date/Time Submitted: <b>09/01/2021 0558 PDT</b>		15. Primary Location, Organization, or Agency Sent To: <b>ONCC</b>											
16. State: <b>CA</b>	17. County / Parish / Borough: <b>El Dorado</b>		18. City:										
19. Unit or Other:	20. Incident Jurisdiction: <b>CA-ENF</b>	21. Incident Location Ownership (if different than jurisdiction):											
22. Latitude/Longitude: Latitude: <b>38° 35' 10"</b> Longitude: <b>120° 32' 16"</b>		23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township:      Range:      Section: 1/4 Sec: of 1/4 Sec:										
25. Short Location or Area Description (list all affected areas or a reference point): <b>2 Miles East of Omo Ranch, 4 miles South of Grizzly Flat</b>			26. UTM Coordinates: Zone:      Easting: Northing:										
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): <a href="https://ftp.wildfire.gov/public/incident_specific_data/calif_n/CALFIRE/!2021_Incidents/CA-ENF-024030_Caldor/GIS/">https://ftp.wildfire.gov/public/incident_specific_data/calif_n/CALFIRE/!2021_Incidents/CA-ENF-024030_Caldor/GIS/</a>													
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents):  <b>Active</b> <b>Group Torching</b> <b>Long-range Spotting</b> <b>Wind Driven Runs</b>  Narrative: <b>The fire remained very active overnight due to the extremely poor humidity recovery and warm temperatures. The fire continued to spread to the northeast in Div K and Div M. Spotting continued to occur through the night, with spots being found up to .5miles away from the edge of the fire. Little to no inversion formed over the incident again allowing for the diurnal down canyon winds to be found in the deep drainages in the lower elevations, while ridgetop strong winds from the southwest continued in the upper elevations. Group tree torching occurred in the drainage and canyons that were in alignment with the winds. The fire continued to back down towards HWY 50 in Div F and Div G with slow rates of spread. Resources continued to find hot material near the lines in Branch 1 and Branch 30, with minimal growth occurring.</b>													
29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):  <b>Timber (Litter and Understory)</b>													

## Incident Status Summary (ICS-209)

Incident: **CALDOR**

**Light Logging Slash  
Brush (2 feet)**

Narrative:

**There is a heavy dead and down component with drought-stressed fuels. The fire area is categorized with extreme to exceptional drought conditions. Live fuels are cured to levels normally seen in late September, and fuels are extremely receptive to spot fires. Fuel moistures are historically low. Northern California remains under a Fuels and Fire Behavior Advisory. ERC's are above the 97th percentile. 100 hr and 1000hr fuels are below the 3rd percentile.**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

**Damage inspections are in progress with apx 60% of structures within the current fire perimeter having been inspected to date. 1,006 structures have been inspected with no damage noted. Reconciliation with the county website will be ongoing.**

**One school, one church, a post office, and two fire stations (Grizzly Flats Forest Service and Pioneer F.D Station 35) were destroyed. Critical elements of potable water supply infrastructure have been damaged and destroyed.**

**Numerous power outages are ongoing as a result of the damage and shutdowns. Significant infrastructure damage has occurred along the HWY 50 corridor, including a critical fiberoptic communication line.**

**Barton Memorial Hospital has been evacuated.**

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	<b>29,000</b>	<b>28</b>	<b>544</b>

<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):  <b>Red Flag Warning for Gusty Winds and Low Relative Humidity in Effect through 2300 Wednesday Evening</b></p> <p><b>Observed:</b>  <b>Strong winds and very low relative humidity aligned up with the terrain to create an extreme fire weather environment. Relative humidity fell as low as 8 percent at several stations as winds gusted to 40 mph over higher ridges. Temperatures remained hot also in the 75-95 degree range depending on elevation.</b></p> <p><b>Forecast for Wednesday:</b>  <b>Windy with strong gusts and low relative humidity. Windy to very windy. Ridgeline wind gusts to 35-40 mph can be expected over the east and northeast edges of the fire with speeds not as high over the lower ridges. Over the west side of the fire expect southwest winds 10-15 mph with gusts to 25 mph through the day. Highs 73-83 higher elevations and 83-90 lower elevations. Min humidity 11-16 percent.</b></p>																															

<p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p> <p><b>Clear air over all areas early except the northeast side. Low daytime and overnight humidity recoveries are expected over the entire fire area again. The RED FLAG WARNING will end at 11 pm with the winds decreasing in velocity. Spotting distances will again be above .75 miles with the Probability of Ignition still above 90%. Rates of spread will slow as the fire enters the sub-alpine fuels, but spotting will continue to be the main contributor to</b></p>	<p>12 hours:</p>
---	------------------

## Incident Status Summary (ICS-209)

Incident: **CALDOR**

	<p>fire growth towards the northeast. Active and passive crown fire runs will continue to occur due to tight tree canopies, topography, and large amounts of surface and ladder fuels. Minimal spread in the southern, western, northwestern, and southeastern divisions. Fire weakened timber continues to release and threaten control lines.</p>
24 hours:	<p>Fire growth will continue to the northeast and east due to the winds with slower rates of spread. Spotting and the extremely dry fuels will continue to allow new fires to become established easily but will progress slower with the decrease in winds. Minimal growth is expected in the south, western, northwestern, and southeastern portions of the incident. The Probability of Ignition will remain around 90% with the spotting distances still around .75miles. Fuels will continue to be extremely receptive to any ember cast.</p>
48 hours:	<p>Diurnal winds return with slower ridgetop speeds. Spotting potential and distances will decrease to .5miles with the Probability of Ignition just below 90%. Minimal growth is expected in the south, west, north, northwestern, and southeastern areas. Firing operations could be a factor for increased fire growth in order to connect control lines. Fire weakened timber will continue to release in all areas of the fire and threaten control lines and delay mop-up. The fire area will begin to receive moderate overnight humidity recovery and higher daytime humidity. This will aid in slowing the rates of spread in areas outside of the main drainages.</p>
72 hours:	<p>Same as above.</p>
Anticipated after 72 hours:	
<b>37. Strategic Objectives (define planned end-state for incident):</b>	
<b>Management Objectives-</b>	
<ul style="list-style-type: none"><li>- Provide for emergency personnel and public safety at all times.</li><li>- Ensure COVID-19 precautions and best practices are met at all times.</li><li>- Protect property, improvements and infrastructure.</li><li>- Ensure coordinated, timely and accurate release of public information.</li><li>- Foster and maintain relationships with all cooperators and stakeholders.</li><li>- Protect economic, natural, cultural and heritage resources.</li><li>- Maintain fiscal accountability and keep costs commensurate with values at risk.</li></ul>	
<b>Control Objectives-</b>	
<b>Keep the fire:</b>	
<ul style="list-style-type: none"><li>- North of HWY 4</li><li>- South of Wentworth Springs Rd</li><li>- East of E-16 and Fiddletown Rd</li><li>- West of HWY 206, Nevada</li></ul>	
<b>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:</b>	
<b>Communities at risk:</b>	
<p>- Significant threat and potential devastation (greater than 75 percent of community loss) to the communities of Camino, Camp Richardson, Caples Lake, Cedar Grove, Christmas Valley, Emerald Bay, Fair Play, Fresh Pond, Grizzly Flats, Happy Valley, Kirkwood, Kit Carson, Kyburz, Lake Valley, Leoni Meadows, Lower Forni, Meeks Bay, Meyers, Newtown, Omo Ranch, Phillips, Plasse, Pleasant Valley, Pollock Pines, Randal Tract, River Pines, Riverton, Sierra Springs, Sierra-at-Tahoe, Silver Lake, Sly Park, Sly Park Hills, Somerset, South Lake Tahoe, Spring Valley, Strawberry, Sweenys Crossing, Tahoma, Twin Bridges, White Hall. In the State of Nevada, Stateline, Kingsbury, and Round Hill Village are threatened.</p>	
<b>Facilities:</b>	
12 hours:	<p>The following repeaters, used by CAL FIRE and other public safety agencies, are all threatened: Alder Ridge Repeater, Leek Springs Repeater, Willow Repeater, Union Hill Repeater</p>
<p>Public safety facilities threatened include Pioneer Fire Protection District Stations, Amador-El Dorado Unit Headquarters, and the Eldorado National Forest-Pacific Ranger Station.</p>	
<p>Many school districts in El Dorado County have either evacuated, canceled school or postponed the start of school due to the fire.</p>	
<b>Powerlines and/or electrical distribution:</b>	

## **Incident Status Summary (ICS-209)**

Incident: **CALDOR**

**PG&E has numerous assets and critical infrastructure threatened including overhead distributions lines, transmission lines, the El Dorado Powerhouse hydro-facility, distribution substations, telecommunications towers, fiber optic resources, and associated equipment. These assets provide power to thousands of customers in El Dorado and the surrounding counties. The approximate value of assets at risk is \$11,300,000.**

**Liberty Utilities has assets of critical infrastructure threatened including distribution lines, transformers, and a substation. Disruption would leave apx 20k customers without water and potable water as their infrastructure provides power for water distribution.**

**Volcano Telephone has a fiberoptic line threatened that runs from Pine Grove to Kirkwood as well as a critical central office location. Disruption would leave apx 5000 people without cellular or telephone coverage.**

### **Domestic Water Systems:**

**The Grizzly Flats CSD has been heavily impacted by the fire including damage to water storage and distribution infrastructure. The district relies on water from surface collection and diversions, both of which are impacted and will result in the loss of water supply to apx 1,200 customers.**

**The El Dorado Irrigation District (130,000 population) also relies on surface water collection in the area of the fire. They operate a diversion facility and 23-mile conveyance system with wooden flumes (have been damaged) of critical importance for the supply of 1/3 of the district's water supply. Replacement cost is estimated at \$68 million dollars and over a year to rebuild.**

**SMUD operates 17 dams; 11 reservoirs; nine powerhouses (688 MW generation capacity) and other essential facilities critical in providing power to the Sacramento region. This includes a 69kv transmission line with wood poles, 28 miles of tunnels, penstocks, and canals. The Riverton maintenance Yard is critical to ensure all equipment is operational.**

**Current 12hr threats are continued below...**

**... Continued from 12-hrs section above:**

### **Communication Grid:**

**The critical fiberoptic line relied on for 911 systems and cell towers from El Dorado County to Lake Tahoe along HWY 50 has been damaged. Numerous communications sites, including Big Hill, a hub for SMUD, CHP, and several cellular carriers are threatened. This site also includes the ENF's Big Hill fire watchtower.**

### **Transportation:**

**HWY 50, HWY 88, and HWY 89 all have closures in place. These Trans-Sierra highways are vital to commerce, tourism, and emergency evacuation and the impact of their closure is substantial. There are many additional road closures around the fire area with traffic control points in place.**

### **Historical and Significant Cultural Resources:**

**24 hours: Numerous prehistoric and historic cultural resources are threatened, including historic buildings and archaeological sites. This includes heritage sites of the Shingle Springs Band of Miwok Indians and the Washoe Tribe of California and Nevada Historic. Structures threatened to include the Sly Park Guard Station, Harvey West Cabin, Armstrong Lookout, Farni Meadows Cabins, Cody Meadows Cabin, FiPi Footbridge, and Alder Lookout.**

### **Natural Resources:**

**The Desolation Wilderness is impacted and the Mokelumne Wilderness is threatened.**

**The Cosumnes, American River, and Lake Tahoe watersheds are impacted. There is a potential threat to the Mokelumne watershed.**

**Threatened and Endangered (TE) state and/or federally listed species threatened by the Caldor Incident include Foothill yellow-legged frog, California red-legged frog, Sierra Nevada yellow-legged frog, Great grey owl, Goshawk and Spotted Owl, Yosemite toad, Sierra Nevada red fox, California wolverine, bald eagle, western bumblebee, bald eagle, and the Lahontan cutthroat trout.**

## Incident Status Summary (ICS-209)

Incident: **CALDOR**

**Under the current Southwest flow, smoke from the Caldor fire is impacting the Lake Tahoe Basin causing periods of Unhealthy to Very Unhealthy Air Quality Index (AQI) readings in locations within the Placer County Air Pollution Control District and the El Dorado Air Quality Management District in California.**

**Commercial Resources:**

**Private businesses, private and federal timberlands (Sierra Pacific Industries), vineyards, and other agricultural lands are threatened and/or impacted.**

**Economic Impact:**

**With the evacuation of South Lake Tahoe and communities in Douglas County, NV, the economic impact on tourism and commerce has been multiplied. This includes resorts, campgrounds, hotels, restaurants, and businesses. Recreational sites for camping, hiking, hunting, boating, fishing & horseback riding sites are impacted. Potential loss of jobs to local businesses with the reduction in tourism and evacuation concerns. Cattle grazing lands are impacted. Local agricultural risk to numerous vineyards and apple orchards.**

48 hours: **Same as above**

72 hours: **Same as above**

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

**28 - Type 1 Engine Strike teams (A)  
25 - Type 3 Engine Strike teams (C)  
15 - Hand Crew Strike teams (G)  
16 - Type 2 Hand Crews  
5 - Type 2 Hand Crews  
13 - Type 6 Engine Strike Teams (F)  
10 - Feller Bunchers**

**AIR OPS:**

12 hours: **1 - HLCO  
1 - Helibase manager  
1 - Deck  
1 - Mobile Retardant Plant  
1 - UAS with aerial ignition**

**OVERHEAD:**

**20 - DIVS  
20 - HEQB  
5 - FALM  
10 - TFLD**

24 hours: **Same as above**

48 hours: **Same as above**

72 hours: **Same as above**

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**With red flag weather conditions and topography in alignment, the fire continues to advance toward the East/Northeast with rapid rates of spread. The fire is impacting South Lake Tahoe communities with structure and infrastructure defense ongoing. Additional resources are critical to the defense of lives, property, and critical infrastructure and are essential to the implementation of planned strategies and tactics.**

**Type I engines are needed for the defense of structures and infrastructure. Type 3 engines are needed for direct attack with hose lays as well as structure defense. Type I hand crews are essential to implement planned firing operations and Type 2 crews are needed to support holding operations. Feller bunchers and falling modules are required to clear miles of roadways of hazard trees to make them safe for travel.**

## Incident Status Summary (ICS-209)

Incident: **CALDOR**

**Steep and rugged terrain, critically dry fuel conditions, and lack of adequate resources have presented control challenges, limiting the ability for direct attack. Combined with the complexity of the incident, these factors have created a critical concern for the ability to assure firefighters and public safety. Life safety and structure defense remain the current incident priorities.**

41. Planned Actions for Next Operational Period:

**Provide for the life safety of citizens and emergency responders. Implement structure and critical infrastructure defense. Construct control lines and take advantage of targets of opportunity as allowed by fire behavior and resource limitations. Improve and hold established control lines. Prepare for firing operations and implement burn plans. Identify and establish contingency lines. Tactical patrol of perimeter contained.**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

43. Anticipated Incident Containment or Completion Date: **09/13/2021**

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$80,441,996.00**

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

**A Fire Management Assistance Declaration was declared on August 17, 2021. Incident Period: August 14, 2021, and continuing. (FM-5413-CA)**

**The Governor of California declared a State of Emergency for El Dorado County on August 17, 2021, due to the Caldor Fire.**

**The Eldorado National Forest is closed from August 17, 2021, through September 30, 2021. (Forest Order No. 03-21-14) To better provide public and firefighter safety due to the ongoing California wildfire crisis, USDA Forest Service Pacific Southwest Region announced a temporary closure of all National Forests in California from Aug. 31, 2021 through September 17, 2021.**

**CAL FIRE IMT-6 and NIMO-2 are in command, with CAIIMT-4 assigned tentative transition to the command of East Zone at 1900hrs 9/1/21.**

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
