

Incident Status Summary (ICS-209)

Incident: **CALDOR**

1. Incident Name: CALDOR		2. Incident Number: CA-ENF-024030	
3. Report Version (check one box): Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: Jeff Veik, CAL FIRE IMT6 Joe Reinarz, USFS NIMO 2	5. Incident Management Organization: Type 1 Team <input checked="" type="checkbox"/> Unified Command	6. Incident Start Date/Time: Date: 08/14/2021 Time: 1854 PDT
7. Current Incident Size or Area Involved (use unit label – e.g., "Acres", "Square Miles"): 207931 Acres	8a. Percent (%) Contained or Completed: 23 %	9. Incident Type: Wildfire B. Incident Description: C. Cause: Undetermined D. Fire Suppression Strategy:	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single Complex Unified command between CAL FIRE and USFS
	b. Total Percentage (%) of Perimeter that will be Contained or Completed: 100 %		
12. Prepared By: Print Name: Jordan Abeel, SITL-t Date/Time Prepared: 09/01/2021 1800 PDT		13. Approved By: Print Name: Jeff Veik, IC Signature: _____	
14. Date/Time Submitted: 09/01/2021 1747 PDT		15. Primary Location, Organization, or Agency Sent To: ONCC	
16. State: CA	17. County / Parish / Borough: El Dorado	18. City:	
19. Unit or Other:	20. Incident Jurisdiction: CA-ENF	21. Incident Location Ownership (if different than jurisdiction):	
22. Latitude/Longitude: Latitude: 38° 35' 10" Longitude: 120° 32' 16"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township: Range: Section: 1/4 Sec: of 1/4 Sec:	
25. Short Location or Area Description (list all affected areas or a reference point): 2 Miles East of Omo Ranch, 4 miles South of Grizzly Flat			26. UTM Coordinates: Zone: Easting: Northing:
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): https://ftp.wildfire.gov/public/incident_specific_data/calif_n/!CALFIRE/!2021_Incidents/CA-ENF-024030_Caldor/GIS/			
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Extreme Long-range Spotting Crowning Torching Narrative: Fire behavior increased dramatically in divisions I and J early in the morning due to the expected strong southwest winds and poor overnight and daytime humidity. This activity was the result of a spot fire that became established on 8/31/21. The current RED FLAG WARNING will end tonight at 23:00. Winds across the fire will moderate this evening resulting in diurnal canyon flows in the lower elevations. The Probability of Ignition continued to trend above 90% with some active crown fire runs that produced long-range ember cast and spot fires. Group torching occurred in areas where the wind speeds were not as strong, but tree canopies were tightly packed, which continued to produce ember cast. The fire continues to back down towards Hwy 50 in multiple locations and produce ember cast that threatens the control lines in Div G and H. Minimal growth occurred in the south, west, and northwest areas. Fire weakened timber continues to release, creating ember-cast and blocking roads.			

Incident Status Summary (ICS-209)

Incident: **CALDOR**

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)
Light Logging Slash
Brush (2 feet)**

Narrative:

There is a heavy dead and down component with drought-stressed fuels. The fire area is categorized with extreme to exceptional drought conditions. Live fuels are cured to levels normally seen in late September, and fuels are extremely receptive to spot fires. Fuel moistures are historically low. Northern California remains under a Fuels and Fire Behavior Advisory. ERC's are above the 97th percentile. 100 hr and 1000hr fuels are below the 3rd percentile.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):
Damage inspections are in progress with apx 60% of structures within the current fire perimeter having been inspected to date. 1,164 structures have been inspected with no damage noted. Reconciliation with the El Dorado County website will be ongoing.

One school, one church, a post office, and two fire stations (Grizzly Flats Forest Service and Pioneer F.D Station 35) were destroyed. A large commercial maintenance building was destroyed at the Sierra-at-Tahoe resort.

Critical elements of potable water supply, including wooden flumes, have been damaged and destroyed. Significant infrastructure damage has occurred along the HWY 50 corridor, including a critical fiberoptic communication line.

Numerous power outages are ongoing as a result of the damage and shutdowns.

Barton Memorial Hospital has been evacuated.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	26,962	28	595
F. Multiple Residences	4,402	1	0
G. Mixed Commercial / Residential	0	0	0
H. Nonresidential Commercial Property	1,023	2	12

33. Life, Safety, and Health Status/Threat Remarks:

34. Life, Safety, and Health Threat

Incident Status Summary (ICS-209)

Incident: **CALDOR**

<p>There are 8 evacuation shelters established and two are at maximum capacity.</p> <p>(8-31-21 1930HRS) NEW DOUGLAS COUNTY, NV EVACUATION WARNING: - Zone 2: Any homes or property located on Foothill Road from Centerville Lane north to Muller. Included in this zone is the valley side of Kingsbury Grade and any homes that are accessed by Foothill Road between Centerville Lane and Muller Lane.</p> <p>The following evacuation orders remain in effect for Alpine County: - The area from Picketts Junction, north on Highway 89 to the Alpine/El Dorado county line. Northeast along the Alpine/El Dorado county line to the California/Nevada state line. Southeast along the Alpine County line to Fay-Luther Canyon. Southwest along FayLuther Canyon to Horse Thief Canyon to Picketts Junction. Evacuation Warnings have been expanded to include the following areas in Alpine County: - The area from Picketts Junction south on Highway 88 to Forestdale Road. Northeast to Hawkins Peak to the Highway 88/Highway 89 junction at Woodfords. East on Highway 88 to the California/Nevada state line. Northwest along the Alpine County line to Fay-Luther Canyon. Southwest along Fay-Luther Canyon to Horse Thief Canyon to Picketts Junction.</p> <p>The following Evacuation Orders in the areas of North Camino and Pollock Pines described below have been downgraded to an Evacuation Warning: North of Highway 50, West of Sly Park, South of Slab Creek, and East of Larsen Drive / Snows Road.</p> <p>EXISTING EVACUATIONS</p> <p>DOUGLAS COUNTY, NV ORDERS: Upper Kingsbury (South), Upper Kingsbury (North), Central Kingsbury, Lower Kingsbury, Round Hill region and roads including Lower Elks Point, Lake Village, Lower Olivers, Kahle Drive region, and roads</p> <p>EL DORADO COUNTY ORDERS: North Camino to Ice House, North US 50 East of Forebay to Ice House, South Pollock & Camino Zone, East Sly Park to Ice House Rd, South Sly Park, Leisure, West Happy Valley, Happy Valley, Grizzly Flat West, Cole Station, West Omo, Omo South, Omo East, Omo Ranch Fill, Henry's Diggings, Leoni Meadows, Dogtown Creek, Big Mountain, Barney Ridge, Caldor, Greater Grizzly, Crystal Basin, US 50 South to Kyburz, Caples Creek, Mormon Emigrant Trail to HWY 88, Zone 4a, Zone 5a, Echo North, Echo South, Christmas Valley, Hell Hole, Washoe Meadows, Meyers, Tahoe Island, Tahoe Keys, Sierra Tract, Al Tahoe, Bijou, Heavenly, Stateline, Tahoma, Fallen Leaf, Trimmer, Pioneer, Gardner Mountain</p> <p>El Dorado County Warnings: Dry Lakes, South of Wentworth Springs, Mosquito, Carson White Oak, Highway 50 South /Newton, Springer, Ant Hill, Mt. Aukum, Coyoteville, Pi Pi, Consumes, Cement Hill, Farnham Ridge</p> <p>Amador County Orders: Zone 4a, Zone 5a</p> <p>Amador County Warnings: Zone 1, Zone 2, Zone 3, Zone 4b, Zone 5b</p> <p>Alpine County Orders: Zones 19, 20, 21, and 22</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th colspan="2" style="text-align: left; padding: 2px;">Management:</th> </tr> <tr> <th style="width: 80%;"></th> <th style="width: 20%; text-align: center; padding: 2px;">Active?</th> </tr> </thead> <tbody> <tr><td style="padding: 2px;">A. Incident Status Summary (ICS-209)

Incident: **CALDOR**

<p>Alpine County Warnings: Zones 23, 24, and 22A.</p> <p>*Evacuation areas are listed according to zones established by the respective county and law enforcement agencies and include orders but not warnings. Full descriptions are available on county websites.</p>	
<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):</p> <p>Observed: Winds were lighter over the ridges today however relative humidity values were still very low. It was extremely dry with minimum relative humidity ranging as low as 8-12 percent. Ridge winds did gust as high as 35 mph however widespread strong winds were very localized. Terrain-driven upslope and up-canyon winds prevailed at speeds of 5-15 mph. High temperatures range from 72-82 over the higher elevations and 82-92 lower terrain.</p> <p>Forecast for tonight: Clear with areas of smoke in lower drainages. Lows 48-55 highest elevations to 56-63 lower elevations. Humidity recovery moderate at 28-34 percent. Winds becoming downslope/downcanyon 4-9 mph with gusts to 13 mph in deepest drainages.</p>	

<p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p>	
12 hours:	<p>Winds in the lower elevations will return to their diurnal down canyon flow, while the upper elevations will continue to experience the southwest winds. Poor overnight humidity recovery will allow any embers to become active when they land in the extremely receptive and dry fuel bed. Fire growth in Divisions I and J will continue throughout the night progressing to the northeast. Minimal growth is expected in the south, west, and northwest divisions. Fire growth is expected to continue in the northeast divisions progressing towards the state line. Growth on the eastern side will be towards Hwy 88, Kirkwood, and Silver Lake. Rates of spread will slow slightly as the fire enters the sub-alpine fuels and rocky terrain, but spotting will continue to be a major factor in fire spread.</p>
24 hours:	<p>Clear air over all areas early except the northeast side. Thin inversion layer building into the lower elevations overnight. Low daytime and overnight humidity recovery is expected over the entire fire area again. Spotting distances will again be between .50 and .75 miles with the Probability of Ignition still above 90%. Rates of spread will slow as the fire enters the sub-alpine fuels, but spotting will continue to be the main contributor to fire growth to the north and northeast. Active and passive crown fire runs will continue to occur due to tight tree canopies, topography, and large amounts of surface and ladder fuels. Minimal spread in the southern, western, northwestern and southeastern divisions. Fire weakened timber continues to release and threaten control lines.</p>
48 hours:	<p>Fire growth will continue to the north, northeast and east. Spotting and the extremely dry fuels will continue to allow new fires to become established easily but will progress slower due to the decrease in winds. The diurnal wind patterns will return producing normal wind flows. Minimal growth is expected in the south, western, northwestern, and southeastern portions of the incident. The probability of ignition will remain around 90% with the spotting distances between .50 and .75miles. Fuels will continue to be extremely receptive to any ember cast. Hot material will continue to be found near the control lines. Moderate overnight and daytime humidity levels return to the area.</p>
72 hours:	<p>Diurnal winds return with slow ridgetop speeds. Spotting potential and distances will decrease to .5miles with the Probability of Ignition just below 90%. Minimal growth is expected in the south, west, northwestern, eastern areas. Firing operations will be a factor for increased fire growth in order to connect control lines. Fire weakened timber will continue to release in all areas of the fire and threaten control lines and delay mop-up. The fire area will begin to receive moderate overnight humidity recovery and higher daytime humidity. This will aid in slowing the rates of spread in areas outside of the main drainages.</p>
<p>Anticipated after 72 hours:</p>	

<p>37. Strategic Objectives (define planned end-state for incident):</p> <p>Management Objectives-</p> <ul style="list-style-type: none"> - Provide for emergency personnel and public safety at all times. - Ensure COVID-19 precautions and best practices are met at all times. - Protect property, improvements and infrastructure. - Ensure coordinated, timely and accurate release of public information. - Foster and maintain relationships with all cooperators and stakeholders. - Protect economic, natural, cultural and heritage resources. - Maintain fiscal accountability and keep costs commensurate with values at risk. <p>Control Objectives-</p>

Incident Status Summary (ICS-209)

Incident: **CALDOR**

Keep the fire:

- **North of HWY 4**
- **South of Wentworth Springs Rd**
- **East of E-16 and Fiddletown Rd**
- **West of HWY 206, Nevada**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Communities at risk:

- **Significant threat and potential devastation (greater than 75 percent of community loss) to the communities of Camino, Camp Richardson, Caples Lake, Cedar Grove, Christmas Valley, Emerald Bay, Fair Play, Fresh Pond, Grizzly Flats, Happy Valley, Kirkwood, Kit Carson, Kyburz, Lake Valley, Leoni Meadows, Lower Forni, Meeks Bay, Meyers, Newtown, Omo Ranch, Phillips, Plasse, Pleasant Valley, Pollock Pines, Randal Tract, River Pines, Riverton, Sierra Springs, Sierra-at-Tahoe, Silver Lake, Sly Park, Sly Park Hills, Somerset, South Lake Tahoe, Spring Valley, Strawberry, Sweenys Crossing, Tahoma, Twin Bridges, White Hall. In the State of Nevada, Stateline, Kingsbury, and Round Hill Village are threatened.**

Facilities:

The following repeaters, used by CAL FIRE and other public safety agencies, are all threatened: Alder Ridge Repeater, Leek Springs Repeater, Willow Repeater, Union Hill Repeater

Public safety facilities threatened include Pioneer Fire Protection District Stations, Amador-El Dorado Unit Headquarters, and the Eldorado National Forest-Pacific Ranger Station.

Many school districts in El Dorado County have either evacuated, canceled school or postponed the start of school due to the fire.

Powerlines and/or electrical distribution:

12 hours: **PG&E has numerous assets and critical infrastructure threatened including overhead distributions lines, transmission lines, the El Dorado Powerhouse hydro-facility, distribution substations, telecommunications towers, fiber optic resources, and associated equipment. These assets provide power to thousands of customers in El Dorado and the surrounding counties. The approximate value of assets at risk is \$11,300,000.**

Liberty Utilities has assets of critical infrastructure threatened including distribution lines, transformers, and a substation. Disruption would leave apx 20k customers without water and potable water as their infrastructure provides power for water distribution.

Volcano Telephone has a fiberoptic line threatened that runs from Pine Grove to Kirkwood as well as a critical central office location. Disruption would leave apx 5000 people without cellular or telephone coverage.

NV Energy has distribution, transmission, and telecom assets in Stateline, Kingsbury, Roundhill, and Carson Valley, Nevada. NV Energy facilities supply power to the entire South Lake Tahoe area which includes delivery points to Liberty Utilities at Meyers and Stateline Substations. The loss of the #111 and #112 (120kV) transmission lines would result in a regional power outage that would extend from Glenbrook, NV to approximately Homewood, CA around the south side of Lake Tahoe. The outages would impact approximately 50,000 NV Energy and Liberty Utility customers.

Domestic Water Systems:

The Grizzly Flats CSD has been heavily impacted by the fire including damage to water storage and distribution infrastructure. The district relies on water from surface collection and diversions, both of which are impacted and will result in the loss of water supply to apx 1,200 customers.

The El Dorado Irrigation District (130,000 population) also relies on surface water collection in the area of the fire. They operate a diversion facility and 23-mile conveyance system with wooden flumes (have been damaged) of critical importance for the supply of 1/3 of the district's water supply. Replacement cost is estimated at \$68 million dollars and over a year to rebuild.

Incident Status Summary (ICS-209)

Incident: **CALDOR**

SMUD operates 17 dams; 11 reservoirs; nine powerhouses (688 MW generation capacity) and other essential facilities critical in providing power to the Sacramento region. This includes a 69kv transmission line with wood poles, 28 miles of tunnels, penstocks, and canals. The Riverton maintenance Yard is critical to ensure all equipment is operational.

Current 12hr threats are continued below...

... Continued from 12-hrs section above:

Communication Grid:

The critical fiberoptic line relied on for 911 systems and cell towers from El Dorado County to Lake Tahoe along HWY 50 has been damaged. Numerous communications sites, including Big Hill, a hub for SMUD, CHP, and several cellular carriers are threatened. This site also includes the ENF's Big Hill fire watchtower.

Transportation:

HWY 50, HWY 88, and HWY 89 all have closures in place. These Trans-Sierra highways are vital to commerce, tourism, and emergency evacuation and the impact of their closure is substantial. There are many additional road closures around the fire area with traffic control points in place.

Historical and Significant Cultural Resources:

Numerous prehistoric and historic cultural resources are threatened, including historic buildings and archaeological sites. This includes heritage sites of the Shingle Springs Band of Miwok Indians and the Washoe Tribe of California and Nevada Historic. Structures threatened to include the Sly Park Guard Station, Harvey West Cabin, Armstrong Lookout, Farni Meadows Cabins, Cody Meadows Cabin, FiPi Footbridge, and Alder Lookout.

Natural Resources:

The Desolation Wilderness is impacted and the Mokelumne Wilderness is threatened.

24 hours:

The Cosumnes, American River, and Lake Tahoe watersheds are impacted. There is a potential threat to the Mokelumne watershed.

Threatened and Endangered (TE) state and/or federally listed species threatened by the Caldor Incident include Foothill yellow-legged frog, California red-legged frog, Sierra Nevada yellow-legged frog, Great grey owl, Goshawk and Spotted Owl, Yosemite toad, Sierra Nevada red fox, California wolverine, bald eagle, western bumblebee, bald eagle, and the Lahontan cutthroat trout.

Under the current Southwest flow, smoke from the Caldor fire is impacting the Lake Tahoe Basin causing periods of Unhealthy to Very Unhealthy Air Quality Index (AQI) readings in locations within the Placer County Air Pollution Control District and the El Dorado Air Quality Management District in California.

Commercial Resources:

Private businesses, private and federal timberlands (Sierra Pacific Industries), vineyards, and other agricultural lands are threatened and/or impacted.

Economic Impact:

With the evacuation of South Lake Tahoe and communities in Douglas County, NV, the economic impact on tourism and commerce has been multiplied. This includes resorts, campgrounds, hotels, restaurants, and businesses. Recreational sites for camping, hiking, hunting, boating, fishing & horseback riding sites are impacted. Potential loss of jobs to local businesses with the reduction in tourism and evacuation concerns. Cattle grazing lands are impacted. Local agricultural risk to numerous vineyards and apple orchards.

48 hours: **Same as above**

72 hours: **Same as above**

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

Incident Status Summary (ICS-209)

Incident: **CALDOR**

	5 - Type 1 Engine Strike teams (A) 5 - Type 3 Engine Strike teams (C) 8 - Hand Crew Strike teams (G) 10 - Type 1 Hand Crews 10 - Type 2 Hand Crews 10 - Type 6 Engine Strike Teams (F) 8 - Feller Bunchers
	AIR OPS: 1 - HLCO
12 hours:	1 - Helibase manager 1 - Deck 1 - Mobile Retardant Plant
	OVERHEAD: 8 - DIVS 10- FELB 10 - HEQB 4 - OPBD 5 - FALM 8 - TFLD
24 hours:	Same as above
48 hours:	Same as above
72 hours:	Same as above
	Anticipated after 72 hours:
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. With red flag weather conditions and topography in alignment, the fire continues to advance toward the East/Northeast with rapid rates of spread. The fire is impacting South Lake Tahoe communities with structure and infrastructure defense ongoing. Additional resources are critical to the defense of lives, property, and critical infrastructure and are essential to the implementation of planned strategies and tactics. Type I engines are needed for the defense of structures and infrastructure. Type 3 engines are needed for direct attack with hose lays as well as structure defense. Type I hand crews are essential to implement planned firing operations and Type 2 crews are needed to support holding operations. Feller bunchers and falling modules are required to clear miles of roadways of hazard trees to make them safe for travel. Steep and rugged terrain, critically dry fuel conditions, and lack of adequate resources have presented control challenges, limiting the ability for direct attack. Combined with the complexity of the incident, these factors have created a critical concern for the ability to assure firefighters and public safety. Life safety and structure defense remain the current incident priorities.	
41. Planned Actions for Next Operational Period: Provide for the life safety of citizens and emergency responders. Implement structure and critical infrastructure defense. Construct control lines and take advantage of targets of opportunity as allowed by fire behavior and resource limitations. Improve and hold established control lines. Prepare for firing operations and implement burn plans. Identify and establish contingency lines. Tactical patrol of perimeter contained.	
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):	
43. Anticipated Incident Containment or Completion Date: 09/13/2021	
44. Projected Significant Resource Demobilization Start Date:	
45. Estimated Incident Costs to Date: \$80,441,966.00	
46. Projected Final Incident Cost Estimate:	
47. Remarks (or continuation of any blocks above – list block number in notation): A Fire Management Assistance Declaration was declared on August 17, 2021. Incident Period: August 14, 2021, and continuing. (FM-5413-CA)	

Incident Status Summary (ICS-209)

Incident: **CALDOR**

The Governor of California declared a State of Emergency for El Dorado County on August 17, 2021, due to the Caldor Fire.

The Eldorado National Forest is closed from August 17, 2021, through September 30, 2021. (Forest Order No. 03-21-14) To better provide public and firefighter safety due to the ongoing California wildfire crisis, USDA Forest Service Pacific Southwest Region announced a temporary closure of all National Forests in California from Aug. 31, 2021 through September 17, 2021.

CAL FIRE IMT-6 and NIMO-2 are in command, with CAIIMT-4 assigned tentative transition to the command of East Zone at 1900hrs 9/1/21.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
