

Incident Status Summary (ICS-209)

Incident: **CALDOR**

1. Incident Name: CALDOR		2. Incident Number: CA-ENF-024030	
3. Report Version (check one box): Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: Jeff Veik, CAL FIRE IMT6 Joe Reinarz, USFS NIMO 2 Rocky Opliger, CIIMT4	5. Incident Management Organization: Type 1 Team <input checked="" type="checkbox"/> Unified Command	6. Incident Start Date/Time: Date: 08/14/2021 Time: 1854 PDT
7. Current Incident Size or Area Involved (use unit label – e.g., "Acres", "Square Miles"): 214107 Acres	8a. Percent (%) Contained or Completed: 37 %	9. Incident Type: Wildfire B. Incident Description: Vegetation C. Cause: Undetermined D. Fire Suppression Strategy:	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single Complex Unified command between CAL FIRE and USFS
	b. Total Percentage (%) of Perimeter that will be Contained or Completed: 100 %		
12. Prepared By: Print Name: Topher Byrd, SITL-T Date/Time Prepared: 09/04/2021 0545 PDT		13. Approved By: Print Name: Dusty Martin, DPIC Signature: _____	
14. Date/Time Submitted: 09/04/2021 0546 PDT		15. Primary Location, Organization, or Agency Sent To: ONCC	
16. State: CA	17. County / Parish / Borough: El Dorado	18. City:	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership (if different than jurisdiction): CA-ENF	
22. Latitude/Longitude: Latitude: 38° 35' 10" Longitude: 120° 32' 16"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township: Range: Section: 1/4 Sec: of 1/4 Sec:	
25. Short Location or Area Description (list all affected areas or a reference point): 2 Miles East of Omo Ranch, 4 miles South of Grizzly Flat			26. UTM Coordinates: Zone: Easting: Northing:
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): https://ftp.wildfire.gov/public/incident_specific_data/calif_n/!CALFIRE/!2021_Incidents/CA-ENF-024030_Caldor/GIS/			
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Active Short-range Spotting Torching Smoldering Narrative: WEST ZONE: The fire activity decreased overnight due to the slight rise in humidity levels and decrease in temperatures across the entire area. The only areas of minimal growth were in Div N and Div I, as crews were able to go direct when save to do so. Hot material continues to be found along the perimeter of all division, as well as an abundant amount of fire weakened timber. Interior islands continued to smolder and burn out. An inversion formed over the area resulting in further decrease in fire behavior, which should burn away by 10am in the lower elevations. Spot fires continued to be found throughout Div N and Div I, as well as small pockets of fire in the granite fields of the sub-alpine fuels. EAST ZONE: Several days of moderated weather have assisted crews with reaching containment objectives. Fuel moistures remain critically low for both live and dead fuels. The Energy Release Component is just below the 90th percentile. The Burning Index is just below the 90th percentile. Wind is one of the major contributing factors to fire spread and growth. Potential for wind driven			

Incident Status Summary (ICS-209)

Incident: CALDOR

surface fire due to alignment. Expect most of the fire growth to be to the north and northeast. Expect an increase in fire activity with clear air. Fire behavior moderated the previous shift, expect similar fire activity.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)
Light Logging Slash
Brush (2 feet)**

Narrative:

There is a heavy dead and down component with drought-stressed fuels. The fire area is categorized with extreme to exceptional drought conditions. Live fuels are cured to levels normally seen in late September, and fuels are extremely receptive to spot fires. Fuel moistures are historically low. Northern California remains under a Fuels and Fire Behavior Advisory. ERC's are above the 97th percentile. 100 hr and 1000hr fuels are below the 3rd percentile.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

Damage inspections are in progress with approximately 75% of structures within the current fire perimeter having been inspected to date. 1,866 structures have been inspected with no damage noted. Reconciliation with the El Dorado County website will be ongoing.

Numerous structures have been damaged or destroyed including a school, post office, fire stations, residences, and commercial buildings.

Critical elements of infrastructure have been damaged and destroyed. This includes portions of E.I.D wooden flumes, valued at \$20m, necessary for the transportation of potable water. A critical fiberoptic line along HWY 50 has been destroyed and will have a significant effect on communications.

Numerous power outages are ongoing as a result of the damage and shutdowns.

Barton Memorial Hospital has been evacuated.

A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
E. Single Residences	26,476	45	687
F. Multiple Residences	4,402	2	0
G. Mixed Commercial / Residential	0	0	0
H. Nonresidential Commercial Property	1,023	8	18
I. Other Minor Structures	0	17	187

31. Public Status Summary:

C. Indicate the Number of Civilians (Public) Below:

	Previous Report Total	A. # this Reporting Period	B. Total # to-date
D. Fatalities	0		0
E. With Injuries/Illness	2	0	2

K. Have Received Mass Immunizations	0		0
L. Require Immunizations	0		0
M. In Quarantine	0		0
N. Total # Responders Affected:	4	3	7

33. Life, Safety, and Health Status/Threat Remarks:

There are 8 evacuation shelters established and two are at maximum capacity.

34. Life, Safety, and Health Threat Management:

Incident Status Summary (ICS-209)

Incident: CALDOR

<p>9/3/21: The following Evacuation Orders have been downgraded to Evacuation Warnings in El Dorado County: The evacuation order for El Dorado County, Central Pollock Pines area has been reduced to a warning. The area described as South of US highway 50, North of Starkes Grade Road, East of Snows Road and West of Fresh Pond.</p> <p>The evacuation order for El Dorado County, South Sly Park, has been reduced to a warning - The area described as south of Starkes Grade Road, north of Sly Park Creek, east of Pleasant Valley Road up to and including the Diamond Garnet subdivision. - Outside the fire line.</p> <p>The evacuation order for El Dorado County, Leisure Zone has been reduced to a warning. The area described as South of Pleasant Valley between Bucks Bar Road and Newtown Road, East of Bucks Bar Road to Mt. Aukum Road. This includes the area of Gopher Hole Road and Moonshadow.</p> <p>The evacuation order for El Dorado County, Grizzly Flats West, has been reduced to a warning. The area described as East of Highway E16, west of Steely Ridge Road, South of the North Fork of the Cosumnes River and North of the Middle Fork of the Cosumnes River - Outside the fire line.</p> <p>The evacuation order for El Dorado County, Happy Valley, has been reduced to a warning. The area described as all properties accessed from Happy Valley Road - Outside the fire line.</p> <p>EXISTING ORDERS AND WARNINGS</p> <p>DOUGLAS COUNTY, NV ORDERS: Upper Kingsbury, Lower Kingsbury.</p> <p>DOUGLAS COUNTY, NV WARNINGS: Douglas Zone 2</p> <p>El Dorado County Orders: Forebay to Ice House, East Sly Park, South Sly Park, Henry's Diggings, Leoni Meadows, Dogtown Creek, Big Mountain, Caldor, Greater Grizzly, Grizzly Flat Proper, Crystal Basin, US 50 South to Kyburz, Caples Creek, Mormon Emigrant Trail to HWY 88, Echo North, Echo South, Christmas Valley, Hell Hole, Washoe Meadows, Meyers, Tahoe Island, Tahoe Keys, Sierra Tract, Al Tahoe, Bijou, Heavenly, Stateline, Tahoma, Fallen Leaf, Trimmer, Pioneer, Gardner Mountain, Desolation, Desolation North, Desolation East.</p> <p>El Dorado County Warnings: Dry Lakes, South of Wentworth Springs, Highway 50 South /Newtown, Springer, Ant Hill, Pi Pi, North Camino, West Omo, Omo South, Omo East, Barney Ridge.</p> <p>Amador County Orders: Zone 4a, Zone 5a</p> <p>Amador County Warnings: Zone 3, Zone 4b, Zone 5b</p> <p>Alpine County Orders: Zones 19, 20, 21A, and 22A</p> <p>Alpine County Warnings: Zones 23, 21B, and 22B.</p> <p>*Evacuation areas are listed according to zones established by the respective county and law enforcement agencies. Full descriptions are available on county websites.</p> <p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): WEST ZONE: Observed: Clear with areas of smoke. Inversions set in after 2000 and persisted through the night. 48-55 highest elevations to 56-63 lower elevations. Humidity recovery poor at 23-28 percent. Winds were downslope/downcanyon 4-9 mph with gusts to 13 mph in deepest drainages.</p>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 80%;"></th> <th style="width: 20%; text-align: center;">Active?</th> </tr> </thead> <tbody> <tr><td>A. Incident Status Summary (ICS-209)

Incident: CALDOR

<p>Forecast: High pressure will remain over the fire area through Sunday with inversion conditions, low relative humidity with poor recoveries and warming temperatures. Increased ridge winds will return by Monday and an overall uptick in winds will occur early next week.</p> <p>EAST ZONE: Observations: Strong inversions formed overnight with very poor humidity recoveries only reaching 20 to 30% along the mid-slopes and ridgelines. Good recoveries occurred in the lower valleys with temperatures in the 30's in the lowest elevations. Ridge winds generally remained out of the southeast gusting to around 20 mph with lighter downslope terrain driven winds over the rest of the fire area.</p> <p>Saturday Forecast: Extremely dry air will remain over the fire area on Saturday with a warming trend continuing through the weekend as high pressure builds over the west. Humidities will drop into the low to mid-teens at all elevations again during the day with very poor recoveries on mid-slopes and ridges. Ridge winds will remain generally out of the southeast 10 to 15 mph with clearer smoke conditions on the east side of the fire. Surface winds remain generally terrain driven with upslope winds 4 to 8 mph during the afternoon and gusts up to 15 mph in canyons.</p>	
--	--

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
12 hours:	<p>WEST ZONE: Limited visibility due to the smokey inversion layer that built overnight. Moderate overnight humidity recover is expected over the entire fire area again. Spotting distances will again be .50 with the Probability of Ignition just below 90%. Rates of spread will slow as the fire enters the rocky sub-alpine fuels, but spotting will continue to be the main contributor to fire growth to the north and northeast. Main fire growth will be in Div I and Div N. Minimal spread in the southern, western, northwestern and southeastern divisions. Fire weakened timber continues to release and threaten control lines. Interior islands will continue to burn out. Hot material continues to be found near and threaten the control lines in the north and eastern divisions.</p> <p>EAST ZONE: Temperatures will be in the 80's. Forecasted winds will be SE 10 mph. Anticipate surface fire, isolated torching and spotting. Poor overnight recoveries will keep fuels receptive. Local thresholds will be exceeded. Expect comparable fire behavior as the previous operational period. The majority of fire growth will most likely be to the northeast and east due to sustained SW winds.</p>
24 hours:	<p>WEST ZONE: Fire growth will continue in Div I and Div N through the rocky sub-alpine fuels. The diurnal wind patterns will return producing normal wind flows. An inversion layer will form again overnight reducing fire activity and visibility in the morning hours. Hot material continues to be found near and threaten the control lines in the north and eastern divisions. Minimal growth is expected in the south, west, northwest, east, and southeastern portions of the incident. Probability of Ignition will remain below 90% with the spotting distance near .50 miles. Interior islands will continue to burn out and create ember cast. Light east winds enter the area. Moderate overnight and daytime humidity levels return to the area.</p> <p>EAST ZONE: Moderate risk burn environment. Slightly warmer today and tomorrow. Instability in the atmosphere due to a Haines of 5. Winds will be S 12 mph. Forecasted south winds over the next several operational periods. Fire behavior will include surface fire, potential torching and spotting. Poor overnight recoveries will keep fuels receptive. Local thresholds will be exceeded. Expect an increase in fire activity with clear air.</p>
48 hours:	<p>WEST ZONE: Winds begin to transition back to the southwest flow. Spotting distances will be near .5miles with the Probability of Ignition just below 90%. Minimal growth is expected in all areas of the incident. Interior islands will continue to burn out and create ember cast. Fire weakened timber will continue to release in all areas of the fire and threaten control lines and delay mop-up. Hot material continues to be found near and threaten the control lines in the north and eastern divisions.</p> <p>EAST ZONE: Temperatures will be in the 80's today. Expect comparable fire behavior to the previous operational period. Forecasted warm and dry weather through the start of the week.</p>
72 hours:	<p>WEST ZONE:</p>

Incident Status Summary (ICS-209)

Incident: CALDOR

Expect similar burning conditions. Temperatures will remain in the mid 80's throughout the week.

EAST ZONE:

Expect similar burning conditions. Temperatures will remain in the mid 80's throughout the week.

Anticipated after 72 hours: **Expect similar burning conditions. Temperatures will remain in the mid 80's throughout the week.**

37. Strategic Objectives (define planned end-state for incident):

Leaders Intent:

Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take appropriate actions regarding:

- **Personal safety and safety of others, including driving slowly, safely, and defensively while implementing tactics that offer a high probability of success.**
- **Professional conduct and timely/effective communications.**
- **Manage fatigue by taking breaks and maintaining work rest guidelines.**
- **All line supervision personnel, including crew leaders and strike team leaders, must attend the Operational Briefing.**

Management Objectives:

- **Provide for emergency personnel and public safety at all times.**
- **Ensure COVID-19 precautions and best practices are met at all times.**
- **Protect property, improvements, and infrastructure.**
- **Ensure accurate coordinated, timely and accurate release of public information.**
- **Foster and maintain relationships with all cooperators and stakeholders.**
- **Protect economic, natural, cultural and heritage resources.**
- **Maintain fiscal accountability and keep costs commensurate with values at risk.**

Control Objectives: EAST

- **Keep the fire south of Mosquito Pass and road systems to N16A, 2N20A, 2N08, and 2N21.**
- **Keep the fire north of Highway 88.**
- **Keep the fire west of El Dorado and Alpine County and the state line boundary.**

Control Objectives: WEST

- **Keep the fire North of HWY 4.**
- **Keep the fire South of Wentworth Springs Rd.**
- **Keep the fire East of E16 and Fiddletown Rd.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Communities at risk:

- 12 hours:
- **Significant threat and potential devastation (greater than 75 percent of community loss) to the communities of Camino, Camp Richardson, Caples Lake, Cedar Grove, Christmas Valley, Emerald Bay, Fair Play, Fresh Pond, Grizzly Flats, Happy Valley, Kirkwood, Kit Carson, Kyburz, Lake Valley, Leoni Meadows, Lower Forni, Meeks Bay, Meyers, Newtown, Omo Ranch, Phillips, Plasse, Pleasant Valley, Pollock Pines, Randal Tract, River Pines, Riverton, Sierra Springs, Sierra-at-Tahoe, Silver Lake, Sly Park, Sly Park Hills, Somerset, South Lake Tahoe, Spring Valley, Strawberry, Sweenys Crossing, Tahoma, Twin Bridges, White Hall. In the State of Nevada, Stateline, Kingsbury, and Round Hill**

Incident Status Summary (ICS-209)

Incident: CALDOR

Village are threatened.

Facilities:

The following repeaters, used by CAL FIRE and other public safety agencies, are all threatened: Alder Ridge Repeater, Leek Springs Repeater, Willow Repeater, Union Hill Repeater

Public safety facilities threatened include Pioneer Fire Protection District Stations, Amador-El Dorado Unit Headquarters, and the Eldorado National Forest-Pacific Ranger Station.

Many school districts in El Dorado County have either evacuated, canceled school or postponed the start of school due to the fire.

Powerlines and/or electrical distribution:

PG&E has numerous assets and critical infrastructure threatened including overhead distributions lines, transmission lines, the El Dorado Powerhouse hydro-facility, distribution substations, telecommunications towers, fiber optic resources, and associated equipment. These assets provide power to thousands of customers in El Dorado and the surrounding counties. The approximate value of assets at risk is \$11,300,000.

Liberty Utilities has assets of critical infrastructure threatened including distribution lines, transformers, and a substation. Disruption would leave apx 20k customers without water and potable water as their infrastructure provides power for water distribution.

Volcano Telephone has a fiberoptic line threatened that runs from Pine Grove to Kirkwood as well as a critical central office location. Disruption would leave apx 5000 people without cellular or telephone coverage.

NV Energy has distribution, transmission, and telecom assets in Stateline, Kingsbury, Roundhill, and Carson Valley, Nevada. NV Energy facilities supply power to the entire South Lake Tahoe area which includes delivery points to Liberty Utilities at Meyers and Stateline Substations. The loss of the #111 and #112 (120kV) transmission lines would result in a regional power outage that would extend from Glenbrook, NV to approximately Homewood, CA around the south side of Lake Tahoe. The outages would impact approximately 50,000 NV Energy and Liberty Utility customers.

Domestic Water Systems:

The Grizzly Flats CSD has been heavily impacted by the fire including damage to water storage and distribution infrastructure. The district relies on water from surface collection and diversions, both of which are impacted and will result in the loss of water supply to apx 1,200 customers.

The El Dorado Irrigation District (130,000 population) also relies on surface water collection in the area of the fire. They operate a diversion facility and 23-mile conveyance system with wooden flumes (have been damaged) of critical importance for the supply of 1/3 of the district's water supply. Replacement cost is estimated at \$68 million dollars and over a year to rebuild.

SMUD operates 17 dams; 11 reservoirs; nine powerhouses (688 MW generation capacity) and other essential facilities critical in providing power to the Sacramento region. This includes a 69kv transmission line with wood poles, 28 miles of tunnels, penstocks, and canals. The Riverton maintenance Yard is critical to ensure all equipment is operational.

Current 12hr threats are continued below...

... Continued from 12-hrs section above:

Communication Grid:

The critical fiberoptic line relied on for 911 systems and cell towers from El Dorado County to Lake Tahoe along HWY 50 has been damaged. Numerous communications sites, including Big Hill, a hub for SMUD, CHP, and several cellular carriers are threatened. This site also includes the ENF's Big Hill fire watchtower.

24 hours:

Transportation:

HWY 50, HWY 88, and HWY 89 all have closures in place. These Trans-Sierra highways are vital to commerce, tourism, and emergency evacuation and the impact of their closure is substantial. There are many additional road closures around the fire area with traffic control points in place.

Historical and Significant Cultural Resources:

Incident Status Summary (ICS-209)

Incident: CALDOR

Numerous prehistoric and historic cultural resources are threatened, including historic buildings and archaeological sites. This includes heritage sites of the Shingle Springs Band of Miwok Indians and the Washoe Tribe of California and Nevada Historic. Structures threatened to include the Sly Park Guard Station, Harvey West Cabin, Armstrong Lookout, Farni Meadows Cabins, Cody Meadows Cabin, FiPi Footbridge, and Alder Lookout.

Natural Resources:

The Desolation Wilderness is impacted and the Mokelumne Wilderness is threatened.

The Cosumnes, American River, and Lake Tahoe watersheds are impacted. There is a potential threat to the Mokelumne watershed.

Threatened and Endangered (TE) state and/or federally listed species threatened by the Caldor Incident include Foothill yellow-legged frog, California red-legged frog, Sierra Nevada yellow-legged frog, great grey owl, goshawk and spotted Owl, Yosemite toad, Sierra Nevada red fox, California wolverine, bald eagle, western bumblebee, and the Lahontan cutthroat trout.

Under the current Southwest flow, smoke from the Caldor fire is impacting the Lake Tahoe Basin causing periods of Unhealthy to Very Unhealthy Air Quality Index (AQI) readings in locations within the Placer County Air Pollution Control District and the El Dorado Air Quality Management District in California.

Up to five SNOTEL data collection sites are threatened. The SNOTEL network is critical for water management in the region in terms of predicting spring streamflow and Lake Tahoe inflows.

Commercial Resources:

Private businesses, private and federal timberlands (Sierra Pacific Industries), vineyards, and other agricultural lands are threatened and/or impacted.

Economic Impact:

With the evacuation of South Lake Tahoe and communities in Douglas County, NV, the economic impact on tourism and commerce has been multiplied. This includes ski resorts, campgrounds, hotels, restaurants, and businesses. Recreational sites for camping, hiking, hunting, boating, fishing & horseback riding sites are impacted. Potential loss of jobs to local businesses with the reduction in tourism and evacuation concerns. Cattle grazing lands are impacted. Local agricultural risk to numerous vineyards and apple orchards.

48 hours: **Same as above**

72 hours: **Same as above**

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

WEST ZONE:

4 - Type 1 Engine Strike teams (A)

4 - Type 3 Engine Strike teams (C)

1 - HLCO

1 - Helibase manager

1 - Deck

2 - OPBD

4 - DIVS

4 - HEQB

EAST ZONE:

12 hours: 10 - HEQB

10 - TFLD

4 - DIVS

4 - Interagency Hotshot Crews

4 - Type 2 IA Crews

1 - RADO

1 - ASGS

2 - BCMG

1 - FACL

8 - EMPF

3 - SOFR

1 - PSC1 or PSC2

Incident Status Summary (ICS-209)

Incident: **CALDOR**

1 - SITL 6 - FOBS 2 - SCKN
24 hours: Same as above
48 hours: Same as above
72 hours: Same as above
Anticipated after 72 hours:
<p>40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:</p> <ol style="list-style-type: none">1) critical resource needs identified above,2) the Incident Action Plan and management objectives and targets,3) anticipated results. <p>Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.</p> <p>WEST ZONE: DIV I - Fire continuing slow movement NE into the Desolation Wilderness (East of Wright's Lake) DIV N - Slow fire movement toward Hwy 88 W/SW of Silver Lake (No movement towards Kirkwood).</p> <p>Steep and rugged terrain, critically dry fuel conditions, and lack of adequate resources have presented control challenges, limiting the ability for direct attack. Combined with the complexity of the incident, these factors have created a critical concern for the ability to assure firefighters and public safety.</p> <p>EAST ZONE: Last night on the northwest side of the East Zone near Lower and Upper Echo Lakes, crews continued to prep structures and construct direct and indirect line.</p> <p>Crews in and around the Highway 50 corridor patrolled and mopped up around structures and along the fire's edge.</p> <p>East of Highway 89, resources held and strengthened the dozer line on the north flank of the northeastern finger of the fire and worked to extend fireline further to the east to mitigate fire growth toward the state line. On the southern flank of the finger crews held and improved firelines.</p> <p>Crews held and improved lines in the Scout Peak and Caples Lake areas.</p> <p>HEQB's and TFLD's requested are to provide adequate span of control for resources, improving safety and coordination. Type 1 and type 2 IA crews are needed to construct line in the remote and rugged Desolation Wilderness and in the difficult terrain of the Trimmer Peak area to mitigate potential threats to the Nevada line and communities in the Foothill Road communities.</p>
<p>41. Planned Actions for Next Operational Period:</p> <p>WEST ZONE: Provide for the life safety of citizens and emergency responders. Implement structure and critical infrastructure defense. Construct control lines and take advantage of targets of opportunity as allowed by fire behavior and resource limitations. Improve and hold established control lines. Prepare for firing operations and implement burn plans. Identify and establish contingency lines. Tactical patrol of perimeter contained.</p> <p>EAST ZONE: In the Christmas Valley area crews continue to construct direct containment lines from Highway 89 west to Scout Peak to reduce the threat to structures.</p> <p>In the Pioneer Trail area, resources will patrol and mop up as necessary.</p> <p>On the northeastern side of the fire in the Cold Creek Drainage area, resources will continue to use a combination of direct and indirect tactics, working with local utility companies to open road systems to connect to dozer line to stem continued fire spread to the northeast.</p> <p>On the southern flank of the eastern finger of the fire, a combination of hand and dozer line will be used to keep fire from moving to the south and east.</p> <p>On the northwest part of the zone, crews will continue to construct direct fireline from Highway 50 toward Lower Echo Lake. In the Lower and Upper Echo Lake areas, structure defense operations will continue.</p> <p>A contingency group is locating and building contingency lines to the northeast of the fire in the event of fire crossing primary containment lines. Mastication is occurring on road systems south of the east zone of the fire.</p> <p>Planning is occurring to mitigate potential threat to communities in the Foothill Road area.</p>

Incident Status Summary (ICS-209)

Incident: **CALDOR**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):
43. Anticipated Incident Containment or Completion Date: 09/27/2021
44. Projected Significant Resource Demobilization Start Date:
45. Estimated Incident Costs to Date: \$102,042,147.00
46. Projected Final Incident Cost Estimate:
47. Remarks (or continuation of any blocks above – list block number in notation): A Fire Management Assistance Declaration was declared on August 17, 2021. Incident Period: August 14, 2021, and continuing. (FM-5413-CA) The Governor of California declared a State of Emergency for El Dorado County on August 17, 2021, due to the Caldor Fire. The Eldorado National Forest is closed from August 17, 2021, through September 30, 2021. (Forest Order No. 03-21-14) To better provide public and firefighter safety due to the ongoing California wildfire crisis, USDA Forest Service Pacific Southwest Region announced a temporary closure of all National Forests in California from Aug. 31, 2021 through September 17, 2021. CAL FIRE IMT-6 and NIMO-2 are in command of the West Zone and CIIMT-4 is in command of the East Zone. Fuels reduction projects that have been implemented around the community of South Lake Tahoe have been highly effective in providing opportunities for resources to successfully suppress fire. Box 45: Incident cost is anticipated to increase due to capturing costs not previously reported. Box 32: 7 total reportable responder injuries: 3 in the West Zone, 4 in the East Zone.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
